The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 8-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Jhabvala (U.S. Patent 4,119,996).

The rejection is maintained as stated in the Office Action mailed 09-20-05, and as stated below.

Jhabvala discloses a substrate 11 having a shallow trench 31 therein, the shallow trench having a bottom (Figure 9, and Column 7, lines 22-35), an isolation layer 35 filling up the shallow trench (Figure 10, and Column 7, lines 49-53), and a P-type doped region 15 as a channel stop layer disposed directly under a bottom of the shallow trench (Figure 10, and Column 7, lines 49-53), wherein the doped region does not extend to a sidewall of the shallow trench (Figures 9-10), and wherein a conductivity type of the doped region is different from a conductivity type of an active device 16 disposed on an active area (Figure 7).

Applicant argues that Jhabvala does not teach that the isolation layer fills up the trench. However, Jhabvala discloses shallow trench 31 filled up with a thick oxide isolation layer 35, as shown in Figure 10, and in Column 7, lines 49-53, and therefore achieving an isolation layer filled up in a shallow trench.

Claims 1-4, and 11-22, are allowed.

In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
